

3- and 4-inch Carbon Filters

Applications

Orenco's 3- and 4-inch (75- and 100-mm) Carbon Filters are used to reduce the odor of sewer gases. Containing impregnated activated carbon, the UV-resistant PVC housing slips onto standard Schedule 40-size pipe. Carbon recharge packages and adapter bushings are available.

Orenco's Carbon Filters fit onto typical building vent systems. The CF4 has more than 1.6 lb (0.7 kg) of impregnated activated carbon, to rapidly adsorb and eliminate offensive odors.

Standard Features & Benefits

- Fits on typical building vent systems, simplifying installation
- Pre-filled with a specially impregnated activated carbon; rapidly adsorbs and eliminates offensive odors
- Includes large amount of carbon; assures long-lasting performance
- Eliminates the use of harmful and expensive chemicals
- Filter housing and cover constructed of corrosion-resistant materials, to ensure long life
- Weather cap prevents rain, snow, and ice from entering filter

Optional Features & Benefits

- Adapter bushings available, allowing filter to mount on virtually any septic venting outlet
- Recharge packages available, simplifying service and extending filter life

Carbon Filtering Process

Odorous gases venting from sewer systems occasionally settle in living areas such as yards, playgrounds and other common public areas.

When our Carbon Filter is placed on the septic venting system, the activated carbon adsorbs the gases before they escape.

(Optional features on back.)

Model Codes for Ordering

3- and 4-inch (75- and 100-mm) Diameter Carbon Filters

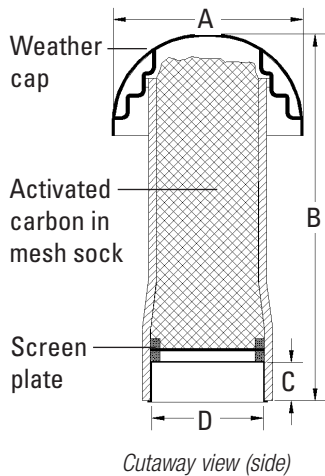

CF

Indicates filter diameter
3 = 3"
4 = 4"

Carbon filter

Dimensions in inches (millimeters)

| | CF3 | CF4 |
|-------------------------------------|-------------|--------------|
| A | 5-1/2 (140) | 5-1/2 (140) |
| B | 10 (254) | 12-1/2 (318) |
| C | 1-1/4 (32) | 1-1/2 (38) |
| D | 3-1/2 (87) | 4-1/2 (113) |
| Carbon weight in pounds (kilograms) | 0.9 (0.4) | 1.6 (0.7) |

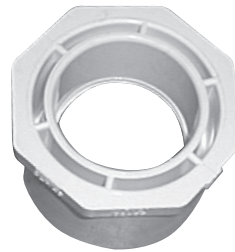

Carbon Filter Accessories

Carbon Filter Recharge Packages

Orenco's Carbon Filter Recharge Packs are a simple, clean method of refilling Carbon Filters. Offered in a ready-to-drop-in pouch for all standard Carbon Filter sizes.

Carbon Filter Bushings

Orenco's Carbon Filter Bushings adapt the mounting flange of the Carbon Filter to an existing vent outlet of different diameter. Molded of PVC and offered for all standard Carbon Filter sizes.
