

FRTA Series Cast-In Tank Adapters

Applications

Orenco's FRTA18 and FRTA24 cast-in adapters are cast into concrete tanks to create a structural, watertight joint for attaching access risers to tanks. The adapter's channel design allows for a watertight adhesive joint that requires no fillet on the inside of the access riser. This makes the FRTA18 and FRTA24 ideal for deep-bury installation with access risers of 3 feet (1 m) or taller.

General

Orenco's FRTA18 and FRTA24 cast-in adapters consist of a fiberglass adapter piece bonded to a section of PVC riser material. Orenco's molded fiberglass products have outstanding part quality and consistency.

Standard Models

FRTA18-CAST, FRTA24-CAST

Materials of Construction

Adapter piece	Fiberglass-reinforced polyester
Riser material	PVC

Specifications

Dimension, in. (mm)	FRTA18	FRTA24
A	19.25 (489)	22.25 (565)
B	16.25 (413)	25.25 (640)
C	0.20 (6)	0.20 (6)
D	0.50 (13)	0.56 (14)
E*	6.00 (150)	6.00 (150)

*± 0.50 inch (25 mm)
